

Hyeongchan Im

Graduate Student
Chungnam University
Seoul 08862, Republic of Korea
chan4im@gmail.com
+82) 010-7131-1014
<https://chan4im.tistory.com/>

EDUCATION

Mar. 2021 ~ Feb. 2025	Chungnam National University Artificial Intelligence <i>B.S. in Artificial Intelligence</i> GPA: 4.02 / 4.5 <i>Cum Laude</i>	Daejeon, Korea
--------------------------	---	-------------------

PUBLICATIONS (INTERNATIONAL)

- **IMFD: End-to-end Multi-Face Forgery Detection through Instruction-based Large Vision-Language Models**, Dasom Choi, Sangjun Moon, Hyeongchan Im, Jaeeon Park, Jingun Kwon, Hidetaka Kamigaito, Taro Watanabe, Manabu Okumura (*AACL-IJCNLP 2026 Findings*)

PUBLICATIONS (DOMESTIC)

1. Hyeongchan Im, Gwanghee Lee, Heedong Park, Kyoungsun Jang, "SwiLU: ReLU 와 Swish 특성을 갖는 단순화된 활성화 함수", 한국정보과학회 2023 한국컴퓨터종합학술대회(KCC 2023)
2. Hyeongchan Im, Taewook Hwang, Sanggun Jung, "Bump형 활성화함수의 모델복잡도 및 데이터셋 크기와의 관계성 연구", 2023 한국소프트웨어종합학술대회 (KSC 2023)
3. 임형찬·고수아·황민·김영국(충남대), 설예인((주)모비, "컨테이너 ID 인식 성능 향상을 위한 이미지 향상 및 복원 기법 연구", 2024 한국소프트웨어종합학술대회 (KSC 2024)

RESEARCH EXPERIENCES

- Research Intern at KIRC (Knowledge Innovation Research Center), KAIST(Korea Advanced Institute of Science and Technology), Korea (Aug. 2026 ~ Present) / AI+X Develop
- Sergeant at 1st Infantry Division, Republic of Korea Army, Korea (Feb. 2025 ~ Aug. 2026) / LLM for Army Designer & Cable system installer
- Research Student at GI-LAB, ChungNam National University, Korea (May. 2024 ~ Feb. 2025) / Undergraduated Researcher
- Research Student at (주)모비다임, ChungNam National University, Korea (Feb. 2024 ~ Present) / 산학협력) 화물차량컨테이너 인식 딥러닝 프로그램 개발
- Research Student at Isoft Lab, ChungNam National University, Korea (Sep. 2023 ~ May. 2024) / Undergraduated Researcher

- Research Intern at Computer Vision and Machine Learning (CVML)Lab, ETRI (Electronics and Telecommunications Research Institute), Korea (Jan. 2024 ~ Feb. 2024)
- Research Student at 2023 Summer Boot Camp, Silicon Valley BootCamp, Korea (Jun. 2023 ~ Aug. 2023)
- Research Student at DIP Challenge Lab, ChungNam National University, Korea (Oct. 2022 ~ Jun. 2023)

AWARDS AND HONORS

- [발전기금] (주)메가스터디, 메가스터디, Korea (Jan. 2021)
- F.A.T.I 자율주행 Contest 장려상, SPG(동아리), Korea (Sep. 2022)
- SW중심대학사업단장학금, SW중심사업단, Korea (Dec. 2022)
- 교내장학금, ChungNam National University, Korea (Sep. 2021 ~ Dec. 2023)

PARTICIPATE A.I CONTEST

- [DACON]: Satellite Image Building Area Segmentation
- [DACON]: Image-based Q&A AI Competition
- [Kaggle]: LLM-Detect AI Generated Text
- [dAiv]: Fine-Grained Visual Classification with Corn Seed Dataset

SKILLS AND TECHNIQUES

- Pytorch / Pytorch Lightning
- Tensorflow / Keras
- WanDB (Weight & Bias)
- Python, C/C++

PROJECTS

- Bus GPS Map Application, ChungNam National University, Korea (Mar. 2022 ~ Jun. 2022)
- 3D Modeling with 3D printer & Lazer Cutting, ChungNam National University, Korea (Nov. 2022 ~ Nov. 2022)
- TorchFlow (Torch + Tensorflow), DIP Lab, Korea (Dec. 2022 ~ Mar. 2023)
- 나만의 소셜 만들기: Make your World, Silicon Valley Summer BootCamp, Korea (Jun. 2023 ~ Aug. 2023)
- Code Similarity Decision Termproject, ChungNam National University, Korea (Oct. 2023 ~ Dec. 2023)
- Eye Tracking (NVIDIA Jetson Orin Nano), ChungNam National University, Korea / Detection / Pose Estimation) (Nov. 2023 ~ Dec. 2023)
- Anomaly Detection in Moving Camera Feeds, ETRI (Electronics and Telecommunications Research Institute): <https://sites.google.com/view/cvml-ust/students?authuser=0#h.hjhw165crsq5>, Korea / Domain Adaptation / Unknown rejection(Out of distribution) (Jan. 2024 ~ Feb. 2024)
- Development of Deep Learning Algorithms and Service Programs for Automatic Recognition of Freight Transport Vehicles for Logistics Automation, MOBIDIGM, Korea (Feb. 2024 ~ Present)

- Military Entrepreneurship Contest 2025, 1st Infantry Division, ROKA, Korea / AI System Design & Project Conceptualization (<https://app.notion.com/p/1e194f513027807eba13e3efedd83>) (Jun. 2025 ~ Dec. 2025)
- RAG-based Intelligent Search System for Army Regulations), 1st Infantry Division, ROKA, Korea / Project Director & Lead Developer (Apr. 2025 ~ Apr. 2026)
- Diagnostic Pathology Using Deep Learning, KAIST(Korea Advanced Institute of Science and Technology), Korea / AI+X Develop (Aug. 2026 ~ Present)

RESEARCH INTERESTS

- Computer vision
- Natural language generation
- Multi modality

RELATED COURSES

- Discrete Mathematics
- Linear Algebra
- Algorithms
- Machine Learning
- Image Processing
- Natural Language Processing
- Deep Learning
- Computer Vision
- Reinforcement Learning
